### **DETAILED ACTION**

1. Claims 1, 4-6, and 8 are pending. Applicant's arguments and amendments filed 1/28/08 have been entered. Note that, Applicant has simply incorporated the limitations of canceled claim 14 into claim 1, thus writing claim 14 as an independent claim. In a decision rendered by the Board of Appeals on 9/28/04, the BPAI affirmed the rejection of claims 1, 4-6, 8, 9, and 12-14 under 35 USC 103(a) using WO98/12295. Thus, the Examiner maintains that '295 is sufficient to reject the instant claims. However, after further consideration, the Examiner has applied this reference under 35 USC 102.

#### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/9/07 has been entered.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

Art Unit: 1796

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or  
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 4-6, and 8 are rejected under 35 U.S.C. 102(a) as being anticipated by WO98/12295.

'295 teaches a composition comprising a dye fixing agent and a specific amino-functional polymer, said composition providing an improved color care on fabrics upon laundry treatments. See Abstract. Suitable dye fixing agents are cationic and are based on various quaternized or otherwise cationically charged organic nitrogen compounds. These agents include Sandofix TPS, Rewin SRF, Rewin SRF\_O, Rewin DWR, Tinofix FRD, etc., and they may be used in the compositions in amounts from 0.001% to 10% by weight. See page 5, lines 1-15. The amino functional polymers have the same general formula as recited by the instant claims. See page 6, line 10 to page 7, line 30. Also, single long chain alkyl cationic surfactants may be used which have the same general formula as recited by instant claim 2. See page 31, lines 10-35. '295 discloses the claimed invention with sufficient specificity to constitute anticipation.

Accordingly, the teachings of '295 anticipate the material limitations of the instant claims.

***Response to Arguments***

Note that, Applicant states that he believes that the instant claims are in condition for allowance. Note that, as stated above, Applicant has simply incorporated the limitations of canceled claim 14 into claim 1, thus writing claim 14 as an independent claim. In a decision rendered by the Board of Appeals on 9/28/04, the BPAI affirmed the rejection of claims 1, 4-6, 8, 9, and 12-14 under 35 USC 103(a) using WO98/12295. Thus, as stated above, the Examiner maintains that '295 is sufficient to reject the instant claims. However, after further consideration, the Examiner has applied this reference under 35 USC 102.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Remaining references cited but not relied upon are considered to be cumulative to or less pertinent than those relied upon or discussed above.

Applicant is reminded that any evidence to be presented in accordance with 37 CFR 1.131 or 1.132 should be submitted before final rejection in order to be considered timely.
